

## CLAIMS

Claim1. A white light source, comprising:  
an insulating substrate;  
a green LED and a blue LED mounted on said insulating substrate; and  
a red color phosphorescent glue and a yellow phosphorescent glue covering said green LED and  
said blue LED such that the light emitted out from the red phosphorescent glue and yellow  
phosphorescent glue is colorless.

Claim 2. The white light source as described in claim 1, wherein said red phosphorescent glue is  
deposited above said yellow phosphorescent glue. .

Claim 3. The white light source as described in claim 1, wherein said red phosphorescent glue is  
deposited below said yellow phosphorescent glue.

Claim 4. The white light source as described in claim 1, wherein the red phosphorescent glue and  
the yellow phosphorescent glue are mixed.
